

## **TECH RIDER INFORMATION**

In order to keep costs low, we travel light.

This means that a presenter needs to provide:

- a. One coconut per show
- b. 12 Dsize batteries for every two shows (for the boombox)
- c. One volunteer to carry the boombox during the show
- d. One volunteer to lead/direct the public along the performance path  
(additional traffic volunteers are needed if we will be crossing busy streets)
- a. A space to warm-up/cooldown, and a safe place for valuables during the show
- b. Someone who can wash and dry a load of laundry between multiple performance days

To do the work, we need two preparation days, in addition to the performance days.

There are 4 or 5 performers.

The performance is about 45-55 minutes long.
